

Easy Peel Retort Film 70 μm

EO-RCPP for Food Packaging

Product Information

Intlpak uses advanced technology to deliver high performance packaging solutions that meet the evolving needs of the marketplace. Our Easy Peel Retort Film (EO-RCPP) is designed for commercial sterilization at 121°C-125°C.

Unlike traditional lidding films that can burst under high pressure and heat, our EO-RCPP maintains seal integrity, consistent peel strength, and performance even after sterilization.

Thanks to our vertically integrated technology and deep manufacturing expertise, EO-RCPP ensures consistent quality, safety, and superior performance-setting us apart from the competition.

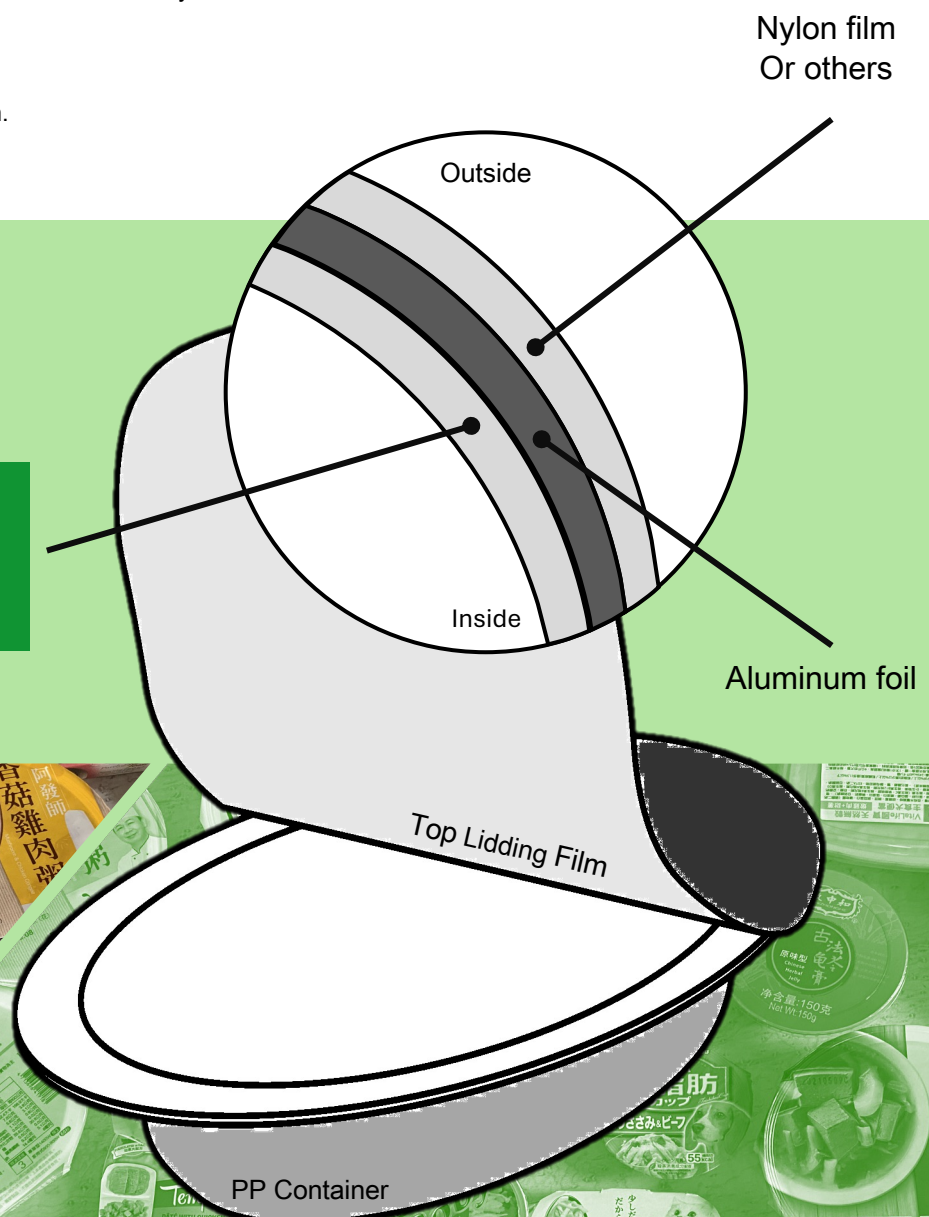

Features

- Stable resistance under heating conditions of 121°C.
- Suitable for high temperature pressure sterilization.
- Wide heat sealing range, more than 30°C.
- Stable peel force before and after sterilization.
- Both are in seal safety and are easy to peel.
- Best for in pet food, canned food, micro food & ready to eat food.

Specification

- Thickness : 30μm、 50μm、 70μm.
- Web Width : Customization.

Easy Peel Retort Film

Easy Peel Retort Film 70 μm

Product Applications

EO-RCPP for Food Packaging

Peel Force

PET 12 μm // ONY 15 μm // EO-RCPP 70 μm film heat sealing curve for PP sheet

Heat seal conditions : Pressure 3.2Kg/cm²、 Time : 1 Sec
Sterilization condition : Temp. 121°C、 Time : 30 Mins

Applications Reference

- Best for in pet food, canned food, micro food & ready to eat food.
- ONY 15 μm // EO-RCPP 70 μm.
